

Performance Check Surface Card - 3 Target (ITEM #12323)

Performance Check Surface Cards are part of an automated testing sequence and tool correction process used to verify and maintain accurate measurement results. Each surface is designed for single-use during routine verification to ensure continued precision in field or lab conditions.

Recommended Use: Conduct one sequence using approximately one surface per day. Performance Check Surface Cards are sold in packs of 25.

- Product Name: Performance Check Surface Card - 3 Target
- Item Number: 12323
- Manufacturer: Brighton Science
- Date of Issue: 05/02/25

Key Features

- Constructed from Kernowprint Pro (PET) Preperforated US stock
- Designed with 3 non-contact yellow target zones for measurement accuracy
- Lightweight, compact, and easy to replace
- Single-use design promotes consistent surface verification
- Compatible with all Brighton Science surface measurement tools
- Cards have been optimized for clean room environments

Handling & Safety

- Do not touch the **yellow target areas** - it is the active surface for reference.
- Store in a clean, dry environment to prevent contamination
- Avoid exposure to solvents, dust, or high humidity
- Dispose of used cards as standard non-hazardous waste

Certifications & Compliance

- Not regulated for transport
- Non-electronic, non-hazardous item
- Recommended usage within 18 months of manufacture
- Manufactured in the USA

Specifications

Material:	Kernowprint Pro (PET) Preperforated US stock
Dimensions (W x H):	2" x 3.5"
Weight:	~1070 mg
Thickness:	7 pt (approx. 0.18 mm)
Color:	Black, Cyan, Magenta, Yellow (target areas)
Target Surface:	Yellow ink regions (non-contact)
Expiration:	18 months from date of manufacture

*Target Area (do not touch)

Packaging & Labeling

- Packaged in protective sleeve (QTY. 25)
- Labeled with product name, lot number, and expiration date

Applications

- Daily performance verification of surface measurement tools
- Process control support for bonding, coating, sealing, and cleaning workflows
- Used in lab and manufacturing environments
- Compatible with all Brighton Science handheld and automated systems
